

# Fenner® QD: Flow

**Fenner® Quick Drive Flow Variable Torque Inverter**  
XXXXX

The Fenner® QD:Flow sets a new standard for dedicated fan and pump control whilst retaining the ease of use you come to expect from Fenner® inverters. The Fenner® QD:Flow has an innovative design, combined with robust performance to provide powerful flow control and reliability in a compact drive.

## Benefits

- > 14 basic parameters, available with IP55 and IP66 enclosures
- > Built in energy optimisation and energy monitoring
- > Built in pump cascade control
- > Multiple fan operation
- > Resonance avoidance
- > Internal RFI filter
- > Belt brake detection
- > Fire-mode
- > BACnet and Modbus RTU as standard
- > Maintenance interval timer

## Size Reference

**IP55** from and to size  
**IP66** from and to size

## Construction

Optional  
LED or OLED  
(IP55& IP66)  
display

Spin start

Hand auto

Belt break detection

Bluetooth Q-Stick programming
