

# ULTIMATE FLEX NMF

THORMAS 2017-01

**Designed and developed as a breathable close fitting glove to keep hands cool and dry, it provides a good grip on dry, greasy and oily objects with its antislip coating. This glove utilizes micro pore technology by infusing nitrile coating with millions of tiny pores, which displaces oils and liquids when pressed against smooth surfaces. This in turn creates suction that further increases grip.**

## STANDARDS & CERTIFICATIONS

EN388:2003

4131

- REACH: 1907/2006 and revisions
- This product is a category II

## IDEAL FOR
