ATEX Declaration

Capelle a/d IJssel
08.02.2024

We herewith declare that our hand-operated ECON valves do not have an ignition source of their own and as such do not fall under the scope of the ATEX Directive 2014/34/EU. Consequently these valves are not to be marked as per the requirements of this Directive.

Motor operated valves should be subjected to a conformity assessment according to Directive 2014/34/EU.
